This cell health profile report represents physiological and pathological cell function for metabolic needs of energy production, based on tissue scanner readings interpretation that has been widely documented throughout scientific literature on micronutrients and orthomolecular medicine. The values are mainly preventive (www.oligolab.org).

Oligolab report is intended for your general knowledge only and is not a substitute for medical advice or treatment for specific health or medical problems. You should consult your healthcare provider for OligoLab report clinical and therapeutic recommendations (supplement prescription, Nutritional protocol or other OligoLab services), otherwise the information should not be considered complete . We do not recommend self-management of health problems.

****Medical claims relied on healthcare providers**
